II. W. RUGG. Fever and Ague.

from which mankind suffer over a large part of the globe, is the consequence of a diseased action in the system, induced by the poisonous miasm of vegetable decay. This exhalation is evolved by the action of solar heat on wet soil, and rises with the watery vapor from it. While the sun is below the horizon this vapor lingers near the earth's surface, and the virus is taken with it through the lurgs into the blood. There it acts as an irritating poison on the internal viscers and excreting organs of the body. The liver becomes torpid and fails to secrete not only this virus, but also the bile from the blood. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the instinct of our organism, as if in an attempt to expel the noxious infusion, concentrates the whole blood of the body in the internal excretories to force them to east it out. The blood leaves the surface, and rushes to the central organs with congestive violence. This is the Carry. But in this effort it fails. Then the sut. The blood leaves the surface, and rushes to the central organs with congestive violence. This is the Cattle. But in this effort it fails. Then the FEVER follows, in which the blood leaves the central organs and rushes to the surface, as if in another effort to expel the irritating poison through that other great excettory—the skin. In this also it fails, and the system abandons the attempt exhausted, and waits for the recovery of strength to repeat the hopeless effort another day. These are the fits or paroxysms of FRVER AND AGUE. Such constitutional disorder will of course undermine the health if it is not removed.

We have labored to find, and have found, an antidate,

Ayer's Ague Cure,
which neutralizes this malarious poison in the blood, and stimulates the liver to expel it from the body. As it should, so it does cure this afflicting disorder with perfect eertainty. And it does more, or rather does what is of more service to those subject to this infection. If taken in season it expels it from the system as it is absorbed, and thus keeps those who use it free from its attacks; keeps the system in health although exposed to the disease.

Consequently it not only cures, but protects from the great variety of affections which are induced by this malignant influence, such as Remittent Fever. Chill Fever, Dumb, or Masked Ague, Periodical Headache, or Bilious Headache, Bilious Fevers, Neuralgia, Rheumatism, Gout, Blindness, Toothache, Earache, Catarrh, Asthma, Palpitations, Painful Affections of the Spleen, Hysterics, Colic, Paralysis, and Painful Affections of the Stomach and Bowels, all of which, when arising from this cause, will be found to assume more or less the intermittent type. This "Acut Cunz" removes the cause of these derangements, and cures the disease.

This it accomplishes by stimulating the excretories to expel the virus from the system; and these organs by degrees become habited to do this their office of their own accord. Hence arises what we term acclimatotion. Time may accomplish the same end, but often life is not long enough, or is sacrificed in the attempt, while this "Acut Cunz" does it at once, and with safety. We have great reason to believe this is a surer as well as safer remedy for the whole class of diseases which are caused by the miasmatic infection, than any other which has been discovered; and it has still another important advantage to the public, which is, that it is cheap as well as good.

EZRA D. HEARTWELL, Presidest, my 27-5v1

GEO. FAIRCRILD, Secretary. Attention! Farmers!

HAVE ENTIRE CONTROL OF A VERY SUperior quality of Russia Winder Seed Wheat,
(an article introduced into the Wheat-growing
districts of Russia,) which has been found to
succeed better than any Winter Wheat ever
cultivated in that country. From Russia it
was introduced into Canada, Michigan, Minnesota and Illinois, in each of which it has withstead the most against suiters and the resitant sota and Illinois, in each of which it has with stood the most severe witters and the wettest springs, to the satisfaction of the farmer. It produces from 20 to 30 bushels to one when sown on good land, and from its hardy nature will not winter-kill or drown-out from the effects of a wet spring. It may be sown any time between the first of July and the first of November.

PACKAGES sufficient to produce from 5 to
10 bushels the first year, put up in strong sacks,
will be sent to any address, on the receipt of
One Dollar, by mail, Address,
